

ProtiFi | Laboratory Scientist

ProtiFi, LLC., based in Rochester, NY, is a global leader in advanced proteomics and omics technologies. Our diverse portfolio of sample preparation products and data analysis tools have revolutionized omics by delivering the accessibility, speed, and reproducibility necessary to quickly move from lab research and real clinical application.

Position Overview:

As a Laboratory Scientist at ProtiFi, you will spearhead pioneering omics and proteomics research, contributing to groundbreaking discoveries in this rapidly evolving and growing field. The position will carry out R&D for the development of new products and technologies.

The Role:

- *Pioneering research and product development:* Drive new omics products R&D from conception to launch using advanced techniques in proteomics, metabolomics, protein chemistry, and mass spectrometry.
- *Technical expertise:* Become a product expert in ProtiFi technologies and their applications to effectively assist in promotion and selling.
- *Teamwork:* Collaborate with Sales, Marketing, and Operations to facilitate knowledge flow between research and sales.
- *Lab leadership:* Manage and maintain a safe and organized laboratory environment and uphold meticulous data recording and safety protocols.

Who you are:

- A passionate scientist with a relevant Bachelor's Degree and ideally a background in biochemistry, proteomics, metabolomics, or a related field.
- Highly organized and detail-oriented, committed to quality and safety, with a demonstrated aptitude for analysis.
- Proficient in laboratory techniques and analytical expertise, with a preference for experience in HPLC/UPLC, protein assays, biochemical separations, mass spectrometry, and analytical software.
- A collaborative team player who thrives in a fast-paced environment.
- Independent thinker/worker that seeks input when needed.
- An expert in deductive reasoning with the ability to communicate reasoning through experimental design, written text, and visual representation of data.

What you get:

- The opportunity to make real impact at the leading edge of rapidly growing omics technologies.
- A dynamic and collaborative work environment where your contributions are recognized and valued.
- Competitive compensation.
- Develop cutting-edge scientific skills while shaping the future of omics and proteomics.
- The opportunity to travel and interact with leading experts in omics research from academia to pharma.

Ready to make a difference?

Apply now and join our team to shape the future of proteomics and “*bring omics technologies to life!*”. To apply, please submit your resume to employment@protifi.com.

About ProtiFi:

ProtiFi, LLC., based in Rochester, NY, is a global leader in advanced proteomics and omics technologies. Our diverse portfolio of sample preparation products and data analysis tools have revolutionized omics by delivering the accessibility, speed, and reproducibility necessary to quickly move from lab research and real clinical application. Known for our intellectual agility and results-oriented focus, our dynamic team serves a broad customer base in academia, pharmaceuticals, contract research organizations, and core and clinical proteomics labs across the US, EU, and Asia/Pacific regions. Evolving from a visionary 2015 Cold Spring Harbor Laboratory spin-out, we work to fulfill the promises of omics technologies and transform those advancements into tangible, available solutions.
